Maintenance of Spay Unit

Ablution block has been enclosed a little more with thicker shadecloth

Del organised 2 rows of kennels each with 4 compartments solid, free standing for holding animals

To be done is putting solar panel on roof as a fixture

General

I have continued to try the half and half outside white city but hasn't proven to be successful; I will continue for a further month and if not well supported maybe a spot in white city.

We have successfully managed to home three kittens this month, two to one house, we will sterilise in due course approx 3 months time.

March 7 I attended the 2nd SAVC (South African Veterinary Council) meeting which is putting together the new vocation of what is now the Animal Welfare Assistant – which in future will be Veterinary Welfare Assistant, this will uplift the standard on the medical side in animal welfare – there is still much to do – one doesn't realise the work involved in putting together a new profession and all the red tape, very interesting.

Marlen and myself have sat and discussed the lotto proposal – this has to be in by September which seems far away, but it is not especially the amount of work and effort that has to be put in to such an application.
